

Custom mobile application built for Secure Communication & Crisis Management

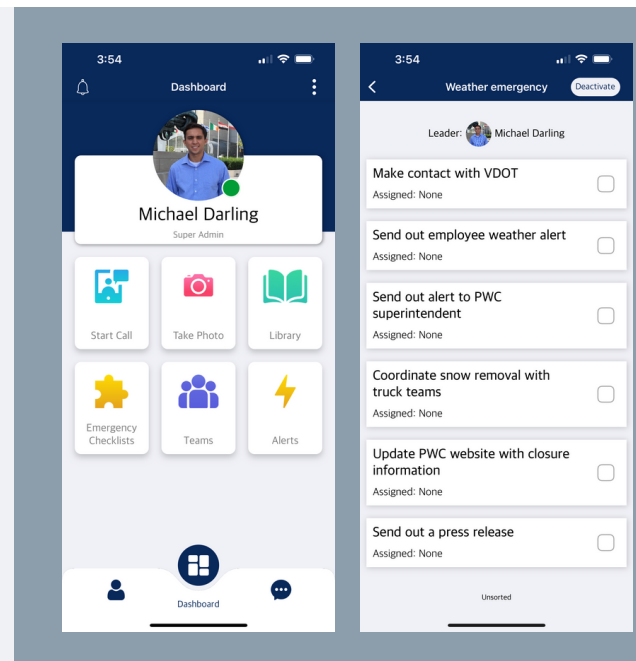

FLASH RTC™ REAL TIME CRISIS COMMUNICATIONS MOBILE APPLICATION

A MOBILE CRISIS COMMUNICATION TOOL FOR LEADERS

Flash RTC™ is a state-of-the-art mobile application that supports today's leaders facing time-critical decision making by streamlining accountability, decision-making, and crisis communications.

KEY ELEMENTS

Flash RTC™ enables unprecedented access to your crisis response team for real time accountability to accelerate an informed response when there is no time to waste. Within moments of an alert you will have access to your organizations' business continuity plans, disaster recovery plans, and emergency response checklists. These critical documents can be customized to meet your most pressing needs when seconds matter.

SAFETY AND ACCOUNTABILITY

Focused on your most precious asset...your people, Flash RTC™ puts the safety and welfare of your personnel just a fingertip away with its rapid and secure "roll call" feature. This function lets you immediately reach every member of your organization via chat, direct messaging, or video and audio conferencing to determine their safety, status, and/or availability to assist with a coordinated crisis response.

ABOUT US

Flash Real-Time Communication (Flash-RTC™) mobile app was created to be a secure video, voice, messaging, communication tool, a password protected document management system, and an alert notification platform that enables leaders and users to communicate, share important documents, and respond to impending or on-going crisis situations.

COMMUNICATION

Video Conference, Audio Conference, and Send Messages all from the Flash-RTC™ mobile app. Calling a team huddle has never been easier. Start a secure group video conference in under 3 clicks! Instantly send urgent push notifications to parents and volunteers. Even if the app is closed, you can create an urgent push notification that will appear on the mobile phone's lock screen. Say goodbye to individual phone calls and emails, now if plans change you can alert everyone in under a minute!

SECURITY

Flash RTC™ provides an encrypted, cross-platform (Android/IOS/Web/Cloud) app that resides outside the reach of threats within your organization's network. This function allows for continued, safe operations, critical decision-making, and secure communications, even in remote business environments.

OUR LEADERSHIP

TPCM-USA is led by Robert Darling, a Marine Corps veteran, presidential helicopter pilot, a senior White House Military Office staff member for President Bush and Vice President Cheney, author of "24 Hours Inside the President's Bunker, 9/11/01: The White House", and a Harvard University JFK School of Government trained facilitator in *Leadership in Crisis; Preparation and Preparedness*.

Ready to Improve Your Resiliency?

TAKE THE NEXT STEP: [REQUEST A FREE DEMO](#)

TPCM-USA will focus on your organization by first performing important readiness assessments to identify and define risks, threats, and vulnerabilities to your organization.

Following this comprehensive assessment and the implementation of business best practices, our team will design and lead customized training

activities and tabletop exercises to ensure optimal learning and leadership confidence. This will be followed up by the introduction and implementation of Flash RTC™, your technology app designed specifically for your organization to help you lead, manage, communicate, and thrive through any critical event.
